

Prevalence and mortality among patients with COPD hospitalised by ambulance in the period 2007-2018

Manuskript nr. UFL-06-21-052

Supplementary Tables

Included diagnosis codes for COPD based on ICD-10 classification

- J44: COPD
- J44.0: COPD with acute lower respiratory infection which is not an influenza
- J44.1: COPD with acute exacerbation, unspecified
- J44.8: Other specified COPD
 - J44.8A: Chronic obstructive bronchitis
 - J44.8B: Chronic asthmatic bronchitis
 - J44.8C: Chronic bronchitis with emphysema
- J44.9: COPD, unspecified

Supplementary table 1: Included diagnosis codes for COPD based on ICD-10 classification

	Population (N)	Ambulance runs (N)	EMS patients with COPD [proportion] (%)
2007	577,062	18,597	324 [5.6] (1.7%)
2008	578,839	20,463	383 [6.6] (1.9%)
2009	580,515	21,463	380 [6.6] (1.8%)
2010	579,628	22,602	498 [8.6] (2.2%)
2011	579,829	24,571	496 [8.6] (2.0%)
2012	579,996	25,698	609 [10.5] (2.4%)
2013	580,272	26,857	611 [10.5] (2.3%)
2014	581,057	28,695	677 [11.7] (2.4%)
2015	582,632	-	- [-] (-)
2016	585,499	30,313	632 [10.8] (2.1%)
2017	587,355	31,699	704 [12] (2.2%)
2018	589,148	33,233	655 [11.1] (2.0%)
Total	-	283,764	5,969 [-] (2.1%)

Supplementary Table 2: Number of emergency medical service patients diagnosed with COPD in the period from 2007-2018, proportion pr. 10,000 inhabitants and proportion of total ambulance runs North Denmark Region. Population from Statistics Denmark, 1st quarter of the year, except 2007 that is 2nd quarter [15]. COPD: Chronic obstructive pulmonary disease. 2015 was not analysed due to the introduction of a new prehospital medical record.
